

KAT Exploration and Bella Viaggio, Inc. Welcome "Senior Vice President of Capital Projects" to Board of Directors

2010-07-29 10:25 ET - News Release

MOUNT PEARL, NEWFOUNDLAND -- (MARKET WIRE) -- 07/29/10

KAT Exploration Inc. (PINKSHEETS: KATX) (www.KATexploration.com) and Bella Viaggio, Inc. (OTCBB: BVIG) are very pleased to announce that *J. Wayne Pickett* has agreed to join the companies as a director and "*Senior Vice President of Capital Projects.*" Mr. Ken Stead, CEO, commented that "on behalf of the board of directors, we are delighted to have someone with this caliber of a geological background to oversee all the company's projects as we move forward ever so rapidly." All present and future geologists along with field crews will work under the direction of Mr. Pickett.

Please check the link for Mr. Pickett's resume.

Also, on June 26th, 2010, 77 new claims were staked around the most Northern claims of the Handcamp property as more new discoveries have been found. This latest discovery is approximately 2 kms to the North of the main Handcamp showing and appears to be an extension of the latest north western anomalies recently discovered through Induced Polarization (IP). This mineralized zone contains very impressive massive sulfides and samples have been sent to the lab for gold and base metal analysis. No drilling or trenching has taken place in those new areas thus far but will be part of another drill phase as we continue to move the project forward.

See attached pictures.

Nine drill holes have been completed to date with all holes intersecting mineralization. Hole #7 tested the mineralized structure at 180 meters (612ft) down section and intersected mineralization over a width of 30 meters. This is extremely encouraging as we now know that, not only does the strike length of the mineralized structure continue for at least a minimum of 1400 meters and open at both ends, it has a minimum depth of 180 meters and also open at depth. With new mineralized structures being discovered to the west and far north, this increases the potential of the property significantly.

Results are beginning to be received from the lab and Jim Weick along with Wayne Pickett will begin the compilation of these results which will be published in an upcoming press release.

This press release contains forward-looking information within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and is subject to the Safe Harbor created by those sections. This material contains statements about expected future events and/or financial results that are forward-looking in nature and subject to risks and uncertainties. Such forward-looking statements by definition involve risks, uncertainties and other factors, which may cause the actual results, performance or achievements of KAT Exploration Inc. to be materially different from the statements made herein.
